PROFESSIONAL SUMMARY

Versatile Artificial Intelligence and Full-Stack Developer with a proven track record of building and deploying end-to-end applications, real-time AI voice agents, and complex automation workflows. Transitioned from corporate AI engineering to independent development, recently delivering complete web solutions for multiple clients and currently building a proprietary AI Resume Builder SaaS. Strong expertise in low-code platforms (n8n, GHL), Python, and full-stack architecture, driving measurable business impact through intelligent technology.

WORK EXPERIENCE

Freelance AI & Web Developer *Independent Consultant*

May 2026 – Present

- Built and delivered complete, responsive web applications for two independent clients, handling full-stack development, database architecture, and API integrations.
- Currently architecting and developing a proprietary "AI Resume Builder" SaaS platform, leveraging large language models to automate and optimize ATS-friendly resume creation.
- Providing end-to-end consulting on AI integrations and business process automation for SMBs.

AI Automation Engineer *Outstandr – AI Solutions Company, Dubai*

Dec 2025 – Apr 2026

- Built and deployed **leadersperformance.ae**, a performance coaching platform featuring AI-driven diagnostics and founder pressure scan tools.
- Built, deployed, and managed the mobile application "**Lionel X**" on both the Apple App Store and Google Play Store.
- Developed conversational AI voice agents using the **ElevenLabs SDK** for real-time, dynamic customer experiences.
- Designed and implemented complex, intelligent automation workflows using **n8n**, **GoHighLevel (GHL)**, and **Python** for business process optimization.
- Created automated lead generation systems, CRM integrations, and seamless user onboarding workflows.

Intern *Novigo Solutions, Mangalore*

July 2025 – August 2025

- Developed an Insurance App login module with MPIN authentication for secure user access.
- Built a Boiler Temperature Monitoring system that sends automatic alerts when temperatures exceed 80°C, ensuring operational safety.
- Assisted in designing and implementing AI-driven application features using Python, scikit-learn, and TensorFlow for data preprocessing, model building, and evaluation.

EDUCATION

Bachelor of Engineering (B.E.) in Artificial Intelligence and Machine Learning *PA College of Engineering, Mangalore*
2025 · GPA: 3.2

Machine Learning Course *Centre for Development of Advanced Computing (CDAC), Bangalore*
June 2025 · Completed a 3-month course on ML fundamentals; built AQI prediction using deep learning.

SKILLS

- **AI & Automations:** n8n, GoHighLevel (GHL), AI Voice Agents (ElevenLabs SDK), LLM Integration
- **Full-Stack Web & App:** HTML, CSS, JavaScript, Flask, RESTful APIs, Mobile App Deployment (App Store / Play Store)
- **Programming:** Python
- **Machine Learning / Vision:** TensorFlow, PyTorch, scikit-learn, OpenCV, Mediapipe, Predictive Analytics
- **Databases & Cloud:** MySQL, Microsoft Azure, AWS
- **Soft Skills:** End-to-End Product Delivery, Client Communication, Problem-Solving

PROJECTS

AI Resume Builder SaaS (In Progress)

A proprietary web application utilizing AI to generate optimized, ATS-friendly resumes for job seekers.

- Architected a full-stack solution with a dynamic frontend and secure backend database.
- Integrated Large Language Models (LLMs) via APIs to automatically tailor resume content based on job descriptions.
- Handled end-to-end development including UI/UX design, user authentication, and deployment.

Air Canvas

Machine learning application enabling air drawing using hand recognition. Tools: OpenCV, Mediapipe, PyQt5.

AQI Prediction Using Machine Learning

Built and deployed a predictive model for real-time Air Quality Index monitoring. Integrated with a Flask API and web interface. Tools: Python, scikit-learn, TensorFlow.

Car Rental Database System

Web-based car rental platform with MySQL backend and responsive frontend.
