PROFESSIONAL SUMMARY

AI & Machine Learning Engineer skilled in Python, TensorFlow, PyTorch, scikit-learn, MySQL, and data analysis. Experienced in developing ML models, computer vision solutions, and end-to-end AI applications. Strong problem-solving and analytical abilities. Open to any opportunity and eager to learn.

PROFESSIONAL EXPERIENCE

Intern – Novigo solutions Jul 2025 – Aug 2025 | Mangalore

- Engineered and implemented the Insurance App login module with MPIN authentication, applying full-stack software engineering principles to ensure secure user access.
- Built a Boiler Temperature Monitoring system that sends automatic alerts when temperatures exceed 80°C, ensuring operational safety.
- Assisted in designing and implementing AI-driven application features for practical use cases.
- Gained hands-on experience in deploying AI solutions and integrating them with real-world applications.

EDUCATION

PA College of Engineering – Mangalore Jan 2025
Bachelor of Engineering (B.E.) in Artificial Intelligence and Machine Learning

Centre for Development of Advanced Computing (CDAC) – Bangalore Jun 2025
Certificate in Machine Learning

Completed a 3 month course on machine learning fundamentals and built a project AQI prediction using deep learning models.

Rooman Technologies Pvt. Ltd. Feb 2025
Cloud Application Developer Certificate

Assisted in the design and development of cloud-based applications. Learned basics about Microsoft Azure and AWS.

Cyber Security Training Nov 2023
Cyber Security Certificate

Explored ethical hacking techniques to identify vulnerabilities in systems and applications.

CERTIFICATIONS

Machine Learning Course – Centre for Development of Advanced Computing (CDAC), India

Cloud Application Developer – Skill India

Introduction to the Threat Landscape – Fortinet

Cybersecurity Fundamentals – Fortinet

Getting Started in Cybersecurity – Fortinet

Introduction to Cybersecurity – Cisco

Ethical Hacking

Python Programming Training – BOLT

TECHNICAL SKILLS

Python: TensorFlow, PyTorch, scikit-learn, Data Analysis, MySQL, Artificial Intelligence & Machine Learning, Microsoft Excel, Web development: HTML, CSS, AI tool proficiency

PROJECTS

AIR CANVAS

- Designed and implemented Air Canvas, a gesture-based drawing application using OpenCV, MediaPipe, and PyTorch, where analytical thinking and problem-solving were applied to overcome challenges in hand tracking precision and real-time rendering.

CAR RENTAL DATABASE SYSTEM

- Web-based rental platform with MySQL backend and responsive frontend using HTML, CSS, JavaScript.

SMART STREET LIGHT SYSTEM

- Arduino-based IoT solution optimizing energy usage via light and motion sensors.

AQI PREDICTION USING MACHINE LEARNING

- Developed, optimized, and monitored a predictive model for real-time Air Quality Index monitoring using machine learning with TensorFlow, leveraging analytical skills to evaluate data trends and applying problem-solving techniques to optimize model accuracy and performance.

LANGUAGES

English (Fluent), Hindi (Fluent), Malayalam (Fluent)
